Sub.: Intimation pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Investor(s) Meeting on 21st March, 2025

Dear Sir / Madam,

Pursuant to Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, we would like to inform you that management of the Company will be meeting the investor(s) in Mumbai on 21st March, 2025.

We are also enclosing herewith the corporate presentation of the Company proposed to be made to the investor(s). The same is also being uploaded on the website of the Company- www.jindalstainless.com.

Please note that the above schedule may undergo a change due to exigencies on the part of Investor(s)/ Company.

You are requested to take the above information on record.

Thanking you,

Yours faithfully

For **Jindal Stainless Limited**

Navneet Raghuvanshi

All load Bearing Members including Girders, Columns, Cross Beams etc.

PROJECT – ROB – Kalyan Shilphata – Kalyan Patripool - MSRDC

Application

Foundations of Bridges, Columns etc.

India Growth & Infrastructure Push - Driving Demand

Leveraging sectoral opportunities

Auto Railways and Transport

400 new Vande Bharat trains to be introduced in the next three years, alongside a 14% rise in railway capital spending. The funds will be used for new lines, track doubling, and implementing the Kavach System.

Investment of ₹ 75,000 crores, including ₹ 15,000 crores from private sources, for 100 critical transport infrastructure projects, for last and first-mile connectivity for ports, coal, steel, fertilizer and food grains sectors.

Railways received ₹2.40 lakh crore for capital outlay, including a project to redevelop over 50 stations into multimodal transit facilities

100 PM GatiShakti Cargo terminals for multimodal logistics to be developed

Replacing old polluting government and municipal vehicles will boost the manufacturing sector, particularly the auto industry, and ultimately increase stainless steel demand in the country.

Infrastructure

Transforming 508 railway stations across the country under Amrit Bharat Station Scheme with an investment of ₹ 25,000 crore

An amount of ₹ 10,000 cr is expected to make available for creating urban infrastructure in Tier 2 and Tier 3 cities

Completion of 25,000km of national highways

50 additional airports and associated air connectivity

Completion of 8 million houses (under the Awas Yojna plan)

Process Industry

For achieving 280 GW of solar capacity by 2030, ₹ 19,500 crore is allocated for PLI for manufacturing units for solar modules

Four pilot projects for coal gasification and conversion of coal into chemicals required for the industry

Improved scientific management of dry and wet waste and modernized sewers with 100% mechanical desludging of septic tanks and sewers, transitioning from manhole to machine-hole mode.

Implementation of the Ken Betwa Link Project to beneficiate 910,000 hectares of farmland, providing drinking water to 6.2 million people

Strong Regulatory Support for SS Adoption

With a view to strengthening the quality of infrastructure build-out in the country, the Government of India has issued several circulars directing the usage of Stainless Steel in key infrastructure sectors. This is providing a tailwind to the demand in the country

The Ministries of Road Transport and Railways now require stainless steel for reinforced bridges in marine government projects to prevent corrosion and maintain bridge strength.

Indian Railway Standard Code of Practice for General Bridge Construction (2018) allows for the use of high-strength deformed stainless steel bars and wires as concrete reinforcement, especially in extreme conditions and coastal areas.

Ministry of Road Transport & Highways Circular: Stainless steel (IS:16651:2017) must be used for reinforced concrete bridges on National Highways in extreme environments.

In March 2023, **RDSO** issued alteration drawings requiring the use of anti-skid checkered plates (**IS 6911 compliant**) for gangways, troll refuges, man refuges, side pathways, etc. They also specified the use of recommended stainless steel grade fasteners by the manufacturer.

Need to make use of stainless steel mandatory in bridges close to the sea: Gadkari

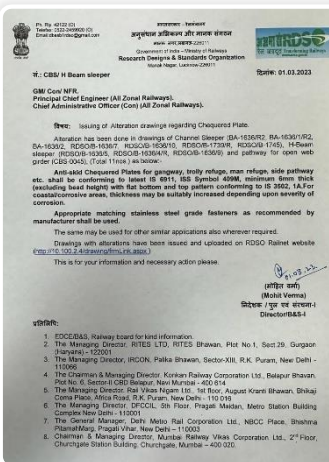

TNN | Jan 4, 2022, 09:51 PM IST

NEW DELHI: Union road transport and highways minister, Nitin Gadkari on Tuesday hinted that the government may bring a policy making the use of stainless steel mandatory in bridges in areas that are close to the sea. The minister said this is necessary while flagging how corrosion is one of the major reasons for weakening the strength of bridges. Releasing a book titled "Building Bridges", which captures how his ministry undertook the task of setting up Indian Bridge Management System (IBMS), the minister said, "In localities like Mumbai and other areas close to the sea there is a common problem of rusting of the steel and that reduces strength of buildings and bridges. We may have to make a law that in areas within 30-50 km of a sea, we need to use only stainless steel. Rusting is a big problem. We also need to carry out more studies to find

solutions."

The minister also said there is a dire need to fix the life or expiry date of bridges; carry out timely repair, but that's possible only when there is data on the status of the bridge. "For this we need to have proper audit reports," Gadkari said.

Empowering Our Nation: Safeguarding Security and Driving Growth

Nuclear Applications

We are one of the two companies globally to supply to the prestigious International Thermonuclear Experiment Reactor (ITER) project, ITER's Cryostat Project in France.

Also, supplied to nuclear power projects at Bhabha Atomic Research Centre and and Indira Gandhi Centre for Atomic Research.

Space Application

Supplying Critical special alloys including low alloy steel grade for the booster engine in satellite launch vehicles and Chandrayaan programs

Green Hydrogen

Supplied 40 Mt for 238 MT Storage capacity in LH2 approx. 10 % of 5MMT storage cap in LH2. Balance SS 316L in Low Pressure Piping, Buffer tanks, Heat Exchangers, Drier etc.

Ballistic And Blast Protection

Various grades for the both ballistic and blast application. The material has been used in various OEMs in India for bullet proof vehicles in India Materials for space application

Marine Application

Super duplex alloy for the submarine rocket launcher system

Missile Application

Stainless steel for various parts: high ductility low alloy steel for the missile launcher and booster engine, martensitic steel for missile and launcher components, spring steel for wing locks and missile wings, and low alloy steel grade for the missile canister.

Harnessing Technology for Customer Experience

Unlocking efficiency and connectivity through digitization

Fueling **Innovation** and **Advancement** through R&D

R&D division plays a pivotal role in retaining and consolidating JSL's leadership position providing agility to alter product and geographical mix with market dynamics

Developing new R&D center in Odisha

Key focus areas for innovation

Advance R&D division - a key factor driving new customer additions

Successfully developed high-value specialty products to serve niche markets

New grades and variants developed for Nuclear, green hydrogen, lift, and elevator, Auto, metro, railways, foot-over bridge, among others

Foray into the Defence sector driven by R&D expertise

Efficiently catering to the on-going requirements of existing customers through customization

Quality upgradation of existing products to cater to all and newly evolving end-user segments

Close interaction with reputed national & international laboratories /scientific institutions / universities for critical investigations

Structural Changes

Sourcing and sales strategy

Planning, operations, sales, and sourcing underwent a complete overhaul ; Adoption of Theory of Constraints (ToC)

More than Five decades of experience supported by data analytics helped in transforming the production from Made to Order (MTO) to Made to Anticipation (MTA).

70% shift to MTA resulting in a reduction in lead time by more than one-third, thereby yielding significant productivity improvement

Drastic shift in raw material procurement moved to domestic sources – switch from far off to near by shores to further shorten the supply chain, suppliers' yards moved closer to the factories

Reduced inventory pipeline, releasing working capital. Debtor days also reduced, strengthening cash flows and balance sheets

Upholding ethical standards and effective governance frameworks

Governance

Policies

Jindal Stainless have formulated several policies within the Company's Corporate Governance framework. These policies help foster an organizational culture that results in transparent, ethical, and responsible operations of the group. Some of the policies and codes adopted by the Company are as featured below:

Whistle blower policy

Policy on disclosure of material event information

Dividend distribution policy

Investor & Shareholder Grievance policy

Remuneration policy

Policy on material subsidiaries

Anti Bribery & Anti corruption policy

Human Right policy

CSR policy

Related party policy

POSH policy

Forex Risk management

Equal Opportunity policy

Product Stewardship

R&D lab at both plants implemented a laboratory management system as per ISO 17025:2017 and certification by NABL to ensure compliance of products as per required specifications.

IATF certification as per IATF 16949:2016 obtained which enforces best practices under Total Preventive Maintenance (TPM).

Stakeholder engagement

The process of identifying stakeholders and engaging with them is based on four elements:

Identification

Open and interactive

Inclusive and proactive

Transparent

Aligned to National & International Frameworks

United Nations
Global Compact

Renewable Energy

For incremental energy requirement of 1MTPA expansion in Odisha, signed MoU with M/s Renew Power- ~300 MW Wind-Solar Hybrid Renewable project to ensure ~100 MW RTC

Jindal Stainless imports RE power through Open Access to comply the RPO by SERC

To increase the Renewable Energy Portfolio into the Energy mix. 21 MWp rooftop solar project is underway

Floating Solar Project (Installed capacity = 7.3MWp, 25 years project; 225,364 MWh energy generation & 2.2 Lakh tCO2 abatement potential

Partnered with Hygenco India Private Ltd.

Growth Roadmap

Strategic Expansion Plan - Upstream and Downstream Augmentation

Three-pronged investment strategy ~**INR 5,700 crore** to achieve global leadership in stainless steel

~1,618 Cr	Chromeni acquisition (100%) 0.6 MTPA Cold Rolling in Gujarat With landbank of ~400 acre
~710 Cr	JV with 49% stake in Indonesia 1.2 MTPA Melt Shop
~1,900 Cr	Downstream HRAP & CRAP Augmentation
~1200 Cr	Upgradation of Infrastructure facilities and ESG projects
~250 Cr	Speciality Steel ESR Furnance & Forging in Hisar

Noteworthy Acquisition

Significant progress and milestones in JSL's journey

Rathi Super Steel Ltd Product Diversification

In November 2022, Jindal Stainless Ltd achieved a successful acquisition of Rathi Super Steel Ltd, adding wire rod and re-bars rolling capacity of 0.16 million tons.

Approach towards product diversification, adds long product (Wire rods & Rebars) in existing product portfolio.

JUSL Integrating the Operations

JUSL acquisition completed on July 20, 2023, with JSL acquiring balanced 74% equity stake for a cash consideration of INR 958 crores.

This acquisition would result in improved synergies between both the companies and a preferred governance structure, thereby enhancing value for all stakeholders.

Stake in NPI Facility Enhancing Raw Material Security

The company has entered into a collaboration agreement with New Yaking Pte Ltd to acquire a 49% stake in a Nickel Pig Iron (NPI) smelter facility in Indonesia.

This strategic partnership aims to strengthen the company's raw material security.

The stake acquisition in the NPI facility marks a significant step towards achieving greater operational efficiency and sustainability.

Rabirun Vinimay Pvt Ltd Product Diversification

In December 2023, Jindal Stainless Ltd achieved a successful acquisition of Rabirun Vinimay Pvt Ltd,

Pipe & tubes capacity of 50KTPA
The plant is located at Vidyasagar Industrial Park, Kharagpur, West Bengal in ~ 60 acres of land area

Strategic Capital Allocation for Sustainable Growth

Leading the Way

Strong Growth and Sustainable Practices in the Value-Added Stainless Steel Sector

Contact Us

India's leading stainless steel manufacturer, Jindal Stainless, has an annual turnover of ~INR 386 bn (US \$4.7 billion) in FY24, and is ramping up its facilities to reach 4.2 million tonnes of annual melt capacity. It has seven stainless steel manufacturing and processing facilities in India and abroad, including in Spain and Indonesia, and a world wide network in 15 countries. In India, there are 10 sales offices and six service centers. The Company's product range includes stainless steel slabs, blooms, coils, plates, sheets, precision strips, blade steel, and coin blanks.

Integrated operations have given Jindal Stainless the edge in cost competitiveness and operational efficiency, making it one of the world's top five stainless steel players (ex-China). Founded in 1970, Jindal Stainless continues to be inspired by a vision for innovation and enriching lives and is committed to social responsibility. The Company boasts of an excellent workforce, value-driven business operations, customer centricity and the best safety practices in the industry.

JSL remains committed to a greener, sustainable future, fueled by environmental responsibility. The company manufactures stainless steel using scrap in an electric arc furnace, the least greenhouse gas emission route since it enables 100% recyclability with no reduction in quality, thereby achieving a circular economy. The company aims to reduce carbon emission intensity by 50% until FY 2035 and achieve Net Zero by 2050.
